

# PLEIADIAN KNOWLEDGE

**INVADED PLANETS**  
**EARTH, MARS AND VENUS**

PLEIADIAN  
KNOWLEDGE

This information is given by women and men from the star Taygeta, in the cluster of the Pleiades. They are different conversations kept live in writing over the internet and reorganized by theme. We keep their original text without any modification.

They can be found in video format on YouTube, on the Pleiadian Knowledge channel of Cristina Álvarez and Estel·la Fernández.

**Start date of the contact:** 12<sup>th</sup> June 2020

**CONVERSATION WITH ANÉEKA OF TEMMER:**

**Cristina:** At some point you commented that there were 9 planets in conditions similar to Earth, apart from Mars and Venus, what are the others?

**Anéeka of Temmer:** The first and most notorious was Alpha Centauri A3 known as Phaeton by others, nowadays re-named Alfrata, which is the main Planet of the Alpha Centauri or Alfrateans. Then in the same system are Sycorax (Alpha Centauri B3), Phainon (Alpha Centauri A4) and Stilbon (Alpha Centauri B1). Plus 5 other planets in Canis Minor, I do not have the data of which. But they are under the positive control of the Procyonians in the area, and they have nothing to do with the Procyonians of Taygeta, from the planet Procyon.

Ok I have them but with somewhat strange nomenclatures:

- Tau-Cete
- GJ 667C -c / GJ 667C-e (In the Canis minor system)
- Sun-13-b (Venus)
- Kepler 296 e

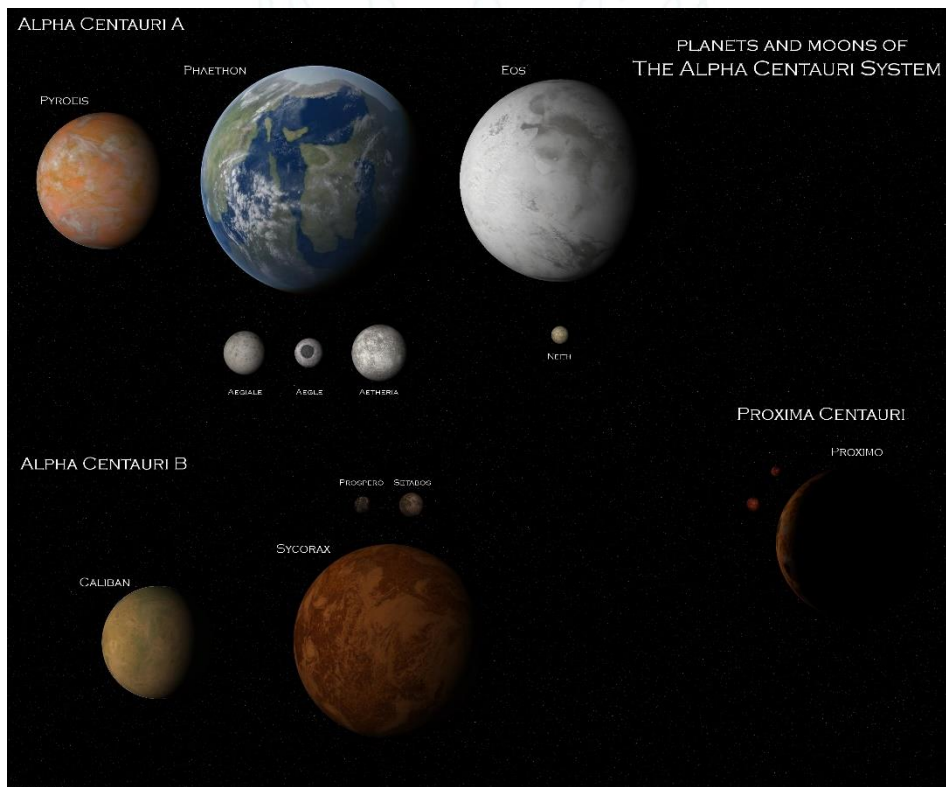

All of them were under regressive control. Not anymore, except for one. Only Sun-13B remains in regressive control (Venus).

**Estel·la:** What is the difference between planet A and B in the Alpha Centauri system?

**Anéeka of Temmer:** There are 3 suns, in a triple system, all 3 orbiting each other. They are Alpha Centauri A, Alpha Centauri B and Alpha Centauri C (Which is a brown dwarf also known as Proxima Centauri)

A or B depends on the sun that each planet orbits.

This image is found on the Internet but the information is correct. Only small planetoids are missing and the names are out of date, or some of them. But correct enough to illustrate the Alpha Centauri system.

Regressives in control of Venus are the same as on Earth and they go to Venus using jump rooms or portals.

**Estel·la:** Is Venus better now than Earth? Does the Federation use the same rules of non-intervention?

**Anéeka of Temmer:** It's the same, only they don't have as much civilian population on Venus as they do on Earth. The Cabal tend to use Venus as a summer resort, for its beaches and luxurious facilities on the seashore, since Venus in 5D is a water planet, like Temmer, mostly water with few solid or dry continents. Tropical paradise planet. Its climate and atmosphere is more stable and gentler to biology than Earth.

You are told that Venus it is very hot and pure sulfuric acid, that is propoganda of the Cabal. In addition to that, there is the problem that if you see things from 3D, you will only see the 3D part of whatever you are looking at. This principle applies to many things.

**Cristina:** Does the cabal have the same agenda there as here? Are the people also suffering from the current situation or are they not attacking the population there?

**Anéeka of Temmer:** As the population is very few, regressives have their attention on Earth, because they have Venus completely dominated and under their control.

**Estel·la:** Like in China then? They are very obedient?

**Anéeka of Temmer:** I think it's different because there is very little civilian population. So they have them under control in other, momentarily less invasive ways. What happens is that, for the cabal, there are so many humans on Earth that it is impossible to continue with a soft control over them. That is what is happening here.

**Estel·la:** Oh of course I understand, that's why they complain that there is overpopulation, but it's because we escaped from their hands...

**Anéeka of Temmer:** Yes, and because you are waking up. What they do not see (but it is on purpose for sure) is that if there are so many humans and with that destructive mentality for the planet it is because of them and their bad influence.

**Cristina:** Are you also helping on Venus?

**Anéeka of Temmer:** Taygeta helps Venus through Earth. Venus is a colony of the Terrestrial Cabal. If the Earth is liberated, Venus is liberated, they go hand in hand. But by releasing only Venus, the Earth is not released. Earth is key. It's just us from Taygeta here to this date, just one ship with 28 Taygeteans.

**Estel·la:** Oh I see, it would be like checkmate!

**Anéeka of Temmer:** Yes.

**Cristina:** And about the planets Tau-Cete, GJ 667C -c, GJ 667C-e and Kepler 296 e, do you know the history of any of them? What happened to them?

**Estel·la:** Yes, how did these planets get to that situation? As happened on Earth, by persecution and reptilian invasion?

**Anéeka of Temmer:** I only know they were very positive planets that lived in peace with no way to protect themselves, only using their high frequency as a shield. In itself, I understand that they did not even think they needed to protect themselves from anything. So the regressives arrived and they just took them very easily, without any resistance. That is precisely why the Federation saw it as a clear decision to free them and get them out. Because it was clearly a direct hostile external intervention, and as a reference the case of Earth is a very complex problem that is not one of traditional direct invasion.

As a side note, this is why someone can't just be love and light as many New Agers say. Because others end up eating you. That is only applicable at high densities, where there is no evil anymore. And that's why some don't understand why Taygeta is militarized (Although not in a human-like way), simply because we have to defend ourselves.

**Estel·la:** Sure, I totally understand. You have to be able to defend yourself and your loved ones.

**Cristina:** Unfortunately, there is a lot of confusion here with all this.

**Anéeka of Temmer:** Be kind and loving to everyone, but always carry a sharp sword with you.
