

THE ORION WARS - NIBIRU - ATLANTIS AND LEMURIA - INVASION OF VENUS

Conocimiento Pleyadiano

14 October, 2021

Video URL: https://youtu.be/ldtaVTo_4hw

This video is a set of several conversations we had with Yázhi Swarúu, a young alien, studying with her the hidden history of the Earth.

Cristina - Presentation

Hello friends. Welcome to Pleiadian Knowledge, I am Cristina. Today we bring you a variety of questions that we asked Yázhi Swarúu, a young alien, while we studied the history of Earth with her. We are passionate about this topic and we know that you are too. So, we have selected some questions that we have found interesting to complete the information already given in the series: 'The Orion Wars.' If you have not seen this series, I recommend you to watch it, otherwise the questions and answers may seem incomplete or will be meaningless. If you don't know where to find this series, you will find it in: playlist, 'The history of the Earth' or you will find the 6 videos in the description of this same video:

VIDEO LINKS: THE ORION WARS

1. INTRODUCTION: The Lyrian Expansion. Video Link: https://youtu.be/31PL1pSH3_I

2. THE PREHISTORY: The origin of the human being. Video Link: <https://youtu.be/5Qhmq-sEqjs>
3. REPTILE INVASION: Atlantis and Lemuria. Video Link: <https://youtu.be/LLr2WJ2s1o0>
4. ADAM AND EVE: Mind Control. Video Link: https://youtu.be/SZu_6XIYF18
5. ANCIENT FIRST BATTLE: The Rebellion of the Garden of Eden. Video Link: <https://youtu.be/1NE8hbsNThI>
6. THE FLOOD: The Battle of Tiamat. Video Link: https://youtu.be/LiLUgRNEM_I

With that said, I will say goodbye. We leave you with the questions and answers. Thank you very much for being here and listening and see you in the next video.

"This information is provided by extraterrestrial persons, women and men from the Taygeta star in the Pleiades cluster, through a written contact with us."

Conversation with Yázhí Swarúu Tasherit

Cristina.- The writer Tolkien, who is famous for writing the 'The Lord of the Rings' saga, did he have real information about what the Earth was like before the cataclysm? Was it based on actual data in any way?

Yázhí Swarúu: Tolkien didn't just get his information out of his mind. It is not his invention, only in part, but what he says is based on ancient pre Celtic and Celtic records. Information that is not released to the public but still exists in places like the Vatican Library. I have the root of the name of Lemuria seen in, 'The Lord of the Rings,' as: 'Moria', only changed as a pun because it refers to the same thing. The name of: 'Mu' is also explained, with this. The contraction of:

ÉL ---> with him 'THE TREE'.

Like in French:

The tree --- L'arbre

Murias --- Mu

L'Murias

L' Muria

Lemuria

Estel-la.- Thank you very much for the information. And what does it mean?

Yázhí Swarúu: The meaning itself I have not found, but it has been found there for thousands and thousands of years in Irish mythology. The history of the lands and the civilization that collapsed from L'Murias. The best explanation based on that Irish mythology about the meaning is: 'Mother Earth,' as in the mother country. Although, I know there must be something even earlier, that is the oldest reference there is. In English: 'The mother land', with that connotation.

It can represent a region or the entire Earth, planet, as an area of enlightened people and also with a clear connotation of matriarchy, perhaps. Also, I see a connection to the fact that it is the Mother Earth from which all Western civilization is born. Also, this is found in bardic texts called Irish mythology today based on reference to the works of Michael Tsairon and Irish origins of Western civilization that coincide with my own or that of Federation records. Lemuria as in ancient Earth.

Cristina.- How interesting, thank you very much, Yázhí. Returning to the previous topic, could you tell us the name of the planets in our solar system?

Yázhí Swarúu.- Yes. Mercury, Venus, Earth, Mars, Tiamat (destroyed, today the asteroid belt), Jupiter, Saturn, Uranus, Neptune, Pluto, Eris 136199 (for the Federation: Ohálu) with a Moon: Dysnomia. Haumea (Moons: Hi'iaaka and Namaka). Makemake (No moons). Sedna (Moonless) All harbor complex life, either on the planet itself or on its moons, or both.

Cristina.- The last three are Federation names?

Yázhí Swarúu.- No. They are familiar names for Earth. Sometimes for the Federation if you do not have a name assigned by natives as in the case of Ohálu, only a number is designated.

Sun - 13 - 10 (Eris)

Sun - 13 - 11 (Haumea)

Sun - 13 - 12 (Makemake)

Sun - 13 - 13 (Sedna)

These last three are considered planetoids or dwarf planets for human science, but strictly speaking this solar system has countless planets, I speak of hundreds if we speak of large rocks the size of an asteroid, being that as a characteristic to be a planet it must orbit the Sun and not another mass.

Cristina.- You have commented that the Federation has other names without them there is an advanced civilization, what does the Federation call Jupiter, Mars or Venus the same as here on Earth?

Yázhí Swarúu.- It happens that those names are ancient on Earth. Not assigned to them like Eris, Haumea, or Makemake would be. As you know, Jupiter was the king god according to the Romans. Mars the god of war and so on. So where did the Romans and the Greeks get it from, we would have to go back to the roots of both languages, they went way back. In itself, for example, Rome was founded by immigrants from various parts, but with the main guide of the so-called Hebrew people who left Egypt during the exodus, following Akhenaten and Nefertiti themselves and they themselves traveled to where today Rome is among other places and where those Hebrew

peoples arrived, that were nothing more than the followers of the monotheism of Nefertiti and Akhenaten, expelled from Egypt by Queen Meritaten. Widely suppressed information. So the names of Mercury, Venus, Earth, Mars, Tiamat, Jupiter, Saturn, Uranus, Neptune and Pluto have stellar origins. So, it's what the Federation calls them to this day. In itself, Eris, Haumea and Makemake among others are still Roman and Greek names, but they were assigned by human science later, and only a few years ago.

Estel·la.- What was our solar system like then? In what order were the planets found? In the same order as today?

Yázhí Swarúu.- With a different order or different distances. There was a large mostly water planet called Tiamat, also called Lucifer, Moon or Phaeton according to other sources. It was where the asteroid belt is today, which is its remains. Asteroids, it is accepted on Earth that they are mostly dirty ice with dirt and stone. That is, the remains of an ocean planet. The planets in general were closer to each other, since the energetic and gravitational dynamics were different due to the presence of Tiamat. There are records on Earth where it is said that the ancients could see the rings of Saturn without needing anything, only with the human eye. I know there are talks about Saturn being before Jupiter. There are records of this, but for me in particular, I find it difficult to do so. In my opinion it was in the same order.

Estel·la.- You have said that there are records on Earth where it is said that the ancients could see the rings of Saturn without the need for anything, only with the human eye. So when you talk about Saturn having horns, are you referring to its rings?

Yázhí Swarúu.- Yes. It is just that, the fact that the horns appear everywhere in records, has another simpler explanation, the Moon. But I must clarify that, in the case of an Apis bull, the disk represented here is the Sun. However, there are the horns. Look at this Apis bull. Look at the cracked top. It is on purpose, it represents the solar portal.

Cristina.- Incredible yes. It's accurate, thank you. And does Tiamat have a relationship with Nibiru as well?

Yázhí Swarúu.- Many in the ancient records confuse Tiamat with Nibiru, it is the same. It is the second Sun because Tiamat was so luminous because as it was a water planet it reflected the Sun like a mirror. Hence the ideas that this solar system is binary, it is not, it is a simple system.

Estel·la.- At the time of Lemuria and Atlantis, what was the concentration of oxygen on Earth?

Yázhí Swarúu.- I don't have it as concise data, but the air was obviously cleaner than it is today. And, yes, there was much more oxygen on average. Just comparing it with Erra or Temmer that have more oxygen than Earth in a very strong concentration close to 79%, but as it is of lower density being 5D it compensates a bit. However, it is toxic to people on Earth. They would need a period of adaptation.

Cristina.- And, going back to the issue of Neanderthals, who exterminated them or why did they become extinct?

Yázhí Swarúu.- Mainly they were exterminated by the explosion of Tiamat, but it is also believed that they were exterminated by the Lyrians themselves, 'homo sapiens'. But, also, we have reptilian intervention information. But in itself the destruction of Tiamat and the flood helped to exterminate them.

Estel·la.- Excuse me, Yázhí, here I am a little confused. You have commented that sometimes they could live together, I understand that they got along well and respected each other. So how could they exterminate them?

Yázhí Swarúu.- Because as with everything, some people, whether Neanderthals or Lyrians, were more morally and spiritually advanced than others. So surely there were differences of opinion. Some coexisted well, others exploited them.

Estel·la.- And, do Neanderthals still exist on other planets, or have they become extinct?

Yázhí Swarúu.- I have no knowledge of where they are, if there are any. But, considering how vast it is outside and that many animals coexist on different planets, chances are they do exist elsewhere. Many on Earth maintain that their genetics still walk among you.

Cristina.- And, continuing with the indigenous races of our solar system, a question, the inhabitants of Jupiter, the Karistus then, are of the sixth density?

Yázhi Swarúu.- In officially accepted explanation, they are from 6D. I personally maintain that densities are only an idea in the mind, therefore, they inhabit all densities, according to them, each of them, depending on the state of their consciousness. To support this, they can be found in 5D easily, let alone above 6D, too. Which backs up what I'm trying to say.

Cristina.- I understand, thank you, Yázhi. And, about the invading reptiles, you commented that the first reptiles to arrive were the Usungal, what reptilian and sauroid races arrived later?

Yázhi Swarúu.- In itself, there have been so many through time that it is impossible to know. The Usungal are taken as the main ones. The main problem is that, according to the data presented by humans, Usungal, for example, Anton Parks, who is the one who began to divulge issues related to that race, maintains that Usungal was created by the Kingu. And, the records I have indicate otherwise. But, in addition to the fact that, logically, it would create more records for me, those of Taygeta and those of the Federation, as I said before, it makes no sense that Kingu has made Usungal since Usungal are common in the galaxy, that is, they are interstellar. And Kingu are contained to Earth. Some will be gone, but no more is known about them. I clarify that point. Other collaborators with Usungal were the Draco, but as I have already explained, Draco is one race and Alpha Draco is quite another.

Cristina.- So, when the reptiles arrived, let's say they chased the Lyrians until there were only eight women left, and it is not known how many men, and they turned them into slaves. Later, the Taygetean base arrived about 20 thousand years ago and settled in Oceana, right?

Yázhi Swarúu.- It is not known if these specifically were made slaves or only those who were freed, but it is known that all human genetics is based on those eight initial women. And then, being so, it is logical to admit that they were taken as slaves, or that they could only procreate eight women if there were more. Regarding Taygeta, they did arrive thousands of years later in the area of Lemuria with some objective of helping them.

Cristina.- Thank you very much Yázhi for the clarification. And, when Taygeta arrived, did any more races arrive at this time? Were they already from the Federation?

Yázhi Swarúu.- Yes. They were already a Federation. At that time, the Soltian race and later the Maya and the Elohi races were all present, all from the Pleiades.

Cristina.- And did all of them found Lemuria?

Yázhi Swarúu.- Lemuria was founded by separatists from Atlantis. Human based Lyrians. This is very clear, Lemuria arose from those who fled from Atlantis, then were supported by other external races that formed bases or colonies there, causing the great conflict.

Estel-la.- And, what position did the Soltian bases and later the Mayans and the Elohim take with the liberation of the Lyrian slaves?

Yázhi Swarúu.- The same as Taygeta, since they are all allied members of Alcione's council, but it is known that the rioters were the Taygeteans to the degree that everything ended in a disaster, literally. And, they do not take away the unruly. They have a tendency not to follow the rules.

Estel-la.- And, regarding Taygeta's influence at that time, what was the Taygetean base on Earth like?

Yázhí Swarúu.- Returning to the Taygetean bases there was not only Lemuria, today French Polynesia and under water. Later there were Taygetean bases where today Ukraine, Russia, Latvia and Lithuania are, with influence over Scandinavian Nordic countries with support from Engan bases in Norway, Sweden and Finland today. The largest Taygetean base on Earth historically speaking was not even that of Lemuria, it was the Ukrainian base specifically in Crimea, today Russia. Where there are still vestiges that the cabal wishes to hide such as pyramids, zero point reactors and entire underground cities with advanced technology.

Estel-la.- If the base of Lemuria was not the largest, why is it the best known today?

Yázhí Swarúu.- Because it is the one that had the most influence on Earth. The largest and most recent is Ukraine in Crimea. Let's say that it can be interpreted that because of the Taygetean base in Lemuria a series of events was triggered that ended in an interplanetary war with the destruction of Tiamat and the formation of the current 3D.

Estel-la.- I understand, thank you, Yázhí. And, continuing with Atlantis, you said that it was a civilization rather with non-interstellar air capability, why not interstellar?

Yázhí Swarúu.- Yes. Some races do not move, or do not move much. Many reasons for that. Still, they do host, cooperate, or collaborate with interstellar races. For example, today the Mayan Sun Mollus of the Pleiades, although before they were interstellar, today they are no longer so. They maintain that they do not see sense in it because they are well on their planet, in their home and being interstellar only takes them away from their home where they really want to be. They have the technology, but their culture has made them sedentary, contrary to Taygeteans who, although in few numbers, are everywhere, always exploring.

Estel-la.- And, about the Atlantean cities such as, for example, Machu Picchu. So they were cities of Sauroids and other races like spaceports at strategic points? And why do those prehistoric buildings look like that? According to official history, they made sacrifices with stones that marked just the summer and winter solstice, or did they point to portals?

Yázhí Swarúu.- Today everything deteriorated seems old, but it is not. Signs of high technology are everywhere, as can be seen in the works of Von Daniken. And, it also happens that other more primitive settlers built and used the same buildings when they moved there. Classic examples of this are the Mayans, the primitive part of theirs that you can see were actually Tolekas immigrants who used the area and the infrastructure when the Maya, the stellar race from M45, retired. The sacrifices, it is said a lot that it was a distorted representation trying to copy a surgical intervention of star beings for medical purposes. I do not doubt that this has to do with it, but it does have another more sinister component, which is to please entities of the lower astral or archons that, I insist, are a manifestation of the individual and collective mind of the human being, but that does not make them any less real.

Estel·la.- Okay. So, I understand that these cities like Machu Picchu were built during the Atlantean civilization totally omitted in our history and were later used by civilizations like the Inca.

Yázhí Swarúu.- Yes, exactly. They are layers on top of layers of civilizations over the same area.

Estel·la.- Of course, the truth is that there is so much data that it is difficult to fit them. According to official data, civilizations like the Inca disappeared from Machu Picchu overnight leaving the entire city intact, was that so? Why?

Yázhí Swarúu.- Although I do not have a direct explanation of why, it is easy to see that they leave overnight if one takes into account that they have stellar roots and interstellar capacity, something that modern terrestrial scientists will hardly accept. They left because of the very collapse of the Atlantean civilization as a result of the Tiamat Wars against the Federation.

Cristina.- Chichén Itzá, was it also from Atlantis?

Yázhí Swarúu.- Yes, and Tikal in Guatemala, too. From Atlantis or known alternate. The problem is that what remains there is archaeologically more recent, but that of recent is also a problem, because as I was saying, the further back something happened, the less linear time is. That's why archaeologists don't like anything and they end up inventing things that didn't happen. Time only seems linear, but it is not and it is not for anyone, not for humans. Just recent direct perception.

Cristina.- And, the Toltecs, the Incas, who were they? Lyrians?

Yázhí Swarúu.- Again it was mixed. In that region there was a lot of Homo Capensis or Elohi, although that name is used by more than one race.

Cristina.- A question about something that the Mayans of the Mayan star have previously commented on. You have said that their arrival, like the Elohi, was later than Taygeta, was it before the cataclysm or after?

Yázhí Swarúu.- I have Solatians and later Engan as they were in small numbers in Lemuria without a base, only present, without much influence, but not Mayan. In themselves, they are much later than those that formed their bases in Mexico and Guatemala, Mesoamerica.

Cristina.- At what point did they occupy cities like Chichén Itzá?

Yázhí Swarúu.- Later. Between the year 0 and the year 1000. Officially between 750 and 1200 AD. Here the official records do fit, at least roughly.

Cristina.- And, the Elohi?

Yázhí Swarúu.- Elohi is between the year 10,000 to about 1,000 BC. And, almost to this day in an orbital form without bases. They are not currently in Earth orbit.

Estel-la.- You have commented that later the Enghan race was also in Lemuria, at what moment did they arrive?

Yázhí Swarúu.- According to my best data, they arrived around the year 800 A.D. Already much more recent. Although, I must admit that there could have been an earlier arrival due to the appearance of nomadic tribes around 50 BC. But en masse with global influence, yes towards the year 800 A.D.

Cristina.- The amount of civilizations and cultures that have interacted and influenced our planet to this day is incredible. Continuing with the Atlantean cities, you explained to us that the Nazca lines were a space port, who made them? Were they made before the flood or later?

Yázhí Swarúu.- Atlantean Civilization, but emphasizing that it was cosmopolitan with the collaboration and cooperation of countless races. They predate the flood. I do not specify if this

area was flooded, but it is most likely that it was not flooded and is much older than the officially accepted one. Because of the position, it was surely not flooded.

Cristina.- Now, we would like to ask you about the situation of our solar system, the other planets. While Atlantis was blooming, what was happening on Venus? You said the invasion was recent, but how and when was Venus invaded?

Yázhí Swarúu.- Venus was a very peaceful place with its own civilization similar to the Neanderthal in the beginning. Then the Lyrians arrived there also after the great expansion or during. It is mostly a water planet. From 3D, only clouds of sulfuric acid can be seen in the absence of 40% of the other elements that compose it as a planet to essentially form a tropical paradise. They only see 60% of what Venus is in 5D. High-detail maps of the true surface of Venus. Attention to Venus had been scant until very recently. They were very peaceful.

Venus was invaded between 1965 and 1975. The Vietnam War that did happen was partly to cover the Cabal's invasion of Venus using the SSP, or Secret Space Program. Thousands of American soldiers, military vehicles, planes and helicopters were sent there. Also, the use of portals was extensive for this invasion. These soldiers at least, for the most part, did not know where they were, thinking that it was just Vietnam in a remote jungle and with strange things around it. There are countless reports of soldiers in Vietnam reporting things that don't add up, like seas and rivers off the official map. Encounters with beings, plants and animals not registered before. Situations where they had to fight against people with strange technologies or unconventional weapons including countless encounters with aliens. An example of this is an encounter between a unit of Navy Seals and beings with appearance and behavior similar to the predators in the Hollywood

movies of the same name. This actual encounter was the basis for the 1986 movie *Predator* with Arnold Schwarzenegger.

Venus was not a hostile planet nor did it really have a way of defending itself, it was a collateral or sympathizer of the Andromedan council which, itself, is part of the larger Federation. Then the Cabal arrived. They invaded all of Venus and they divided it up among themselves, giving new names to their islands and places. Names like: New Kamchatka or Kennedy Islands. Today it is totally invaded and is a colony of the Earth Cabal. Many of the famous people and politicians retire there for vacations or to hide. For this reason, many traveled to Antarctica recently since from there they have jumping places through large portals. Since nowadays the Federation does not allow them to leave with their ships, but by portal they continue to come and go.

According to the Federation, the fall of the Earth Cabal and liberation (of Earth) would bring with it as a consequence that Venus is also liberated. The cabal has two large colonies outside of Earth. The largest being Venus, the other is on Mars where they occupy three quarters of the surface and DUMBS underground.

Cristina.- Wow. Thank you very much Yázhí. This is very interesting and connects many things. We have many questions that I think we are going to write down and if you think it is good to go deeper one day.

Yázhí Swarúu.- Sure, as you wish. I know it's hard to process or believe, but I have very detailed information on this event.

Estel-la.- Last question now that you have commented on Mars. You explained to us that the planet was devastated after the explosion of Tiamat and that now it is only desert with some patches of green areas, who is there now? In what situation are the Mantis of Ohálu?

Yázhí Swarúu.- Mars today is divided into three parts, one dominated by the Mantis, another by the Tall Grays commonly called Maitre and the third part is inhabited by terrestrial human beings under total Reptilian control, part of the so-called secret space program or SSP for their acronym in English. Although these Ohálu mantises are considered neutral, the truth is that they cause more problems than the help they give. They are known to have helped regressive reptiles on more than one occasion. They are difficult to treat and the Lyrian races generally avoid them. Its political structure is a hive mind with a queen as bees would have. I must clarify that there are countless mantis races, many of them very advanced and characterized by their nobility and love. It's just that these specifically present in Ohálu are difficult. And, they are the ones with a large base or large colony on Mars. They used to be separatists when the Tiamat wars happened. It is known because they are resident in that modern Ohálu. Today they are only colonies of Ojálu in full cooperation with their part of civilization.
