BORN NOT TO THINK - CONVERSATION WITH AN EXTRATERRESTRIAL WOMAN - Aneeka de Temmer - Taygeta

Anéeka: All that noise of exopolitics that the "experts" bring is false and is a narrative imposed by the CIA-Cabal.

Robert: It's just, Anéeka, we're already far away from all of them. At the level of exopolitics of any information we are very far from all of them. I even allow myself to say that I can speak of advanced exopolitics at the "god" level. Not stupid wars on Ceres.

I think they don't believe that we are the creators of our reality.

Anéeka: No, because they only see the deterministic, and within a particular point of view yes, existence is deterministic, from another it is not, and it becomes less deterministic the higher your consciousness.

Robert: Yes. They are unaware of all off-Earth "energetic" dynamics and this is by design. Although I am very clear that we are the creators of reality.

Anéeka: Yes, and being that doesn't mean that we don't perceive things in a deterministic way many times. You don't fight one thing with the other.

Robert: Yes.

"A large fleet of spacecraft belonging to highly evolved aliens has recently entered our solar system according to 'Such a Person', who has over 35 years of contact experiences. He states that these positive aliens along with higher dimensional beings are here to overseeing a fundamental change in the way our solar system and planet work. Discuss the collapse of the Deep State and regressive aliens in this interview."

Anéeka: None of that is reflected here. It is not that simple and that is a clear reflection of human thought. Conveniently put today with everything that happens on the planet. No "positives" are going to come because they have been "already here" for eons, they have never left. Whether they are "the positives" or not, is just points of view according to what interests they have.

The Earth, even in its state of suffering, is like a school, like a test for souls. From above they don't see what happens there as real.

Nor are there high densities that reason in a way to have concepts like revolutionizing the way the solar system works. Those are concepts that would be either human, or what they themselves would call low

densities like 5D which has nothing to do with the idyllic 5D consciousness imposed by so many New Agers.

Robert: A few days ago something came to my mind. Before having contact with you, I was in BCN in the real estate agency with Gosia, and in one of my meditations I thought about what my life in Finland could be like. And now I see that I had the ability to change my point of attention.

The problem that there is now is "this one that we see today". But I have the contact too. We are the creators. And as we say, you are the one who will determine by your level of consciousness how your "Movie-Life" will end. Each one from their reality. But many go to disaster.

Aneeka: Yes. Because they fall into the spiral of perception and mental control, creating all that a few are interested in creating.

But having fallen into that is also by their own hand, by decisions that it is more comfortable for them to go with the system because they want to continue with their interests, therefore they follow the rules at a destructive level.

Robert: I think that now we will have time to calm down so that people do not relate this to what is going to happen in 2 years that will be a consequence of today. Yes. Voluntarily. If I wear the banderillas I can travel and enter restaurants and entertainment venues. They become compatible with this situation.

Anéeka: And that's why they say they "have" to follow the narrative.

Robert: **Yes, correct and they don't come out of there. Religion, Politics, Economy, and the most media.**

Aneeka: There is something that defines the bulk of humanity and that is that they have no thought of their own, but rather a hive mind. That's the problem. Many even believe that they have a single thought and it is not so. They still follow pre-established parameters and put there by the controllers, for example the official narrative about history in general or science and the scientific method.

Robert: Correct. "They have no thought of their own, but a hive mind." "Many even believe that they have a single thought and it is not so."

Anéeka: **Yes, very seriously. That is why truly awakened people cannot make their fellow human beings see the falsity of the plandemic, because they are talking not with a person but with the Matrix itself. They can't see it because they think it's Uncle Jorge, or the mother, or the daughter, Doctorcita Matrix.**

Robert: Right, "because they are talking not to a person but to the Matrix itself." They are talking to the Matrix. They are the Matrix. YES. "For example the official narrative about history in general or science and scientific method." That is what these "authorities" that dictate what is real and unreal are based on to impose the collective unconscious

Aneeka: **It is that as we have said before. Everything is false, everything they say and explain and I mean EVERYTHING. So, to know the truth, the only thing left is to have a lot of willpower and mental strength, and study everything there is as information, and thereby form an idea or cosmology of one's own reality with the best data available at any given time and with the important quality or nature that must always be changing as new data is incorporated. Not only contrasting data in the investigations but processing them with a view to forming a changing and unique logic. That's from a strong mind.**

Robert: Yes. It is what we always say, "the nature of which must always be changing as new data is incorporated." Do not stay with what is socially accepted when new information arrives. Because in the end that is what will define you.

Anéeka: **But if you need a lot of IQ, a lot of mental resources.**

Many people would say that they don't have the time for work or taking care of the family, but that is only a little limiting but not entirely, it is only an excuse not to do it, since with enough mental resources you can

be thinking and processing data while working on something else.

Robert: Stay with what really interests you. If you "don't have the time for work or family," it's just excuses and more excuses. Yes.

Anéeka: But another point about humanity is that they are trained not to think, because to think is to face themselves, their person, their shadows, everything that characterizes them, the good and the bad.

As Michael Tsarion says: "The human being will do everything possible not to think, not to be in front of themselves."

And this can be seen in the need for humans to constantly be with their noses buried in the mobile playing basic silly games (better a console, right?) or even putting on cheap parasitized pop music and with agendas blaring even further of the device's capacity, all in order to obscure their own thoughts. "It is not going to be that they begin to think".

Robert: Yes. For not facing his fears that he will spit as a reflection of the one he will have in front of him. Exactly, "overshadow their own thoughts".

Anéeka: Even the fact that on Earth someone who appears to be doing nothing, in a state of contemplation, is asked, "What are you doing?", and his answer is "thinking", that thinking is taken as something negative because in mind of the human Matrix community to be thinking is equivalent to plotting something "bad". They already associate it.

That is why many ask if one is the creator of reality. Why are my wishes not fulfilled? Well, because from where you generate that reality is from the unconscious, from all those things that you repress and don't dare to face, like your deepest desires.

Robert: Yes. I always say that I am thinking. And everyone wonders why I always answer the same. It is that if I am thinking of everything, not something fixed but everything. That's why I'm not bored.

Anéeka: Sure.

Robert: "If one is the creator of reality, why don't my wishes come true?" Yes. Many ask themselves that question. And they don't come out of there. They are in the collective unconscious.

Anéeka: Yes, exactly.

Robert: Where not even his thoughts are his own.

Anéeka: Exactly.

Robert: They think what they want you to think.

Anéeka: They're not yours.

Robert: And to think is to create right?

Anéeka: Yes.

Robert: Yes. They just want you to believe for them not for you that you are the Source.

Anéeka: It's like a "plan", a planning (of making plans,) and a planning about what you want to form and create.

Robert: Yes. That's why you will always be generating Lush while you don't wake up.

Anéeka: Sure.

Robert: And they don't come out of there. Until something makes them re-impact. Like your info that

stimulates the brain to see another vision of reality. Not the same as always, that's why we have been criticized so much. Because they don't want people to wake up. Those who criticized us are regressive. But because?

Anéeka: Yes, many are, but I think others simply believe that they are doing the right thing with or according to their level of consciousness.

Robert: Yes, of course. Your info changes us and we share it and everyone is grateful. And they also say that this changed their lives.
